

NUPANELS®
FROM MEGAWALL

NuPanels System Components

The NuPanels System is composed of 3 basic components, each available in various standard and even custom sizes. All components are faced with 1" aluminum MegaWall™.

Retrofit Panel Section

Drops into any standard gondola, adds strength and an updated look.

End Cap Panel

Replaces pegboard and updates end caps with 1" MegaWall™.

Wing Panel

Adds additional merchandise space on the end of gondola end caps.

*Graphic Size: 3.6" wide x height
.090" max thickness*

48" H.

54" H.

66" H.

Additional sizes available.

NuPanels - Panel-Mod™ Clip System

The Panel-Mod™ clip system enables the installation of a 1" aluminum MegaWall Panel onto standard slotted gondola uprights. Top sections, bottom sections or anywhere slots are available. 24" high panels standard with optional +/-6" increments. An instant way to highlight key visual areas or update old gondola units.

- Available in 6" vertical increments.
- Works with Panel-Mod™ MegaWall.
- Installs in minutes.
- Fits standard slotted gondola uprights.

Panel-Mod clips fit into matching extrusions and wedge securely into slotted gondola uprights.

NuPanels - End Cap Panels

End Cap Panel Assembly for 36" or 48" Wide Gondolas

Replaces pegboard panel on 36" or 48" wide end caps.

- Single-sided
- 34-17/32" wide for 36" units.
- 46-17/32" wide for 48" units.
- 1" slat spacing, aluminum.
- Installs in minutes.

Sized to fit 48", 60" and 72" high gondolas. Additional sizes available.

Retrofit Panel Sections

NuPanels™ are 2-sided modular sections that drop into any standard gondola. They're able to function as independent top or bottom sections in 6" increments—or as entire panels. Gondola slotted uprights remain totally accesible for shelving, header signs or inserts with no interference.

- 12", 24" & 36" Standard heights
- Fits 36" or 48" gondolas
- Modular double-sided sections
- Anodized aluminum
- 1" Slat spacing
- Installs in minutes

48" Wide x 24" High

36" Wide x 24" High

Additional sizes available.
