

Accepts Both Floating Shelves & Slatwall Hardware

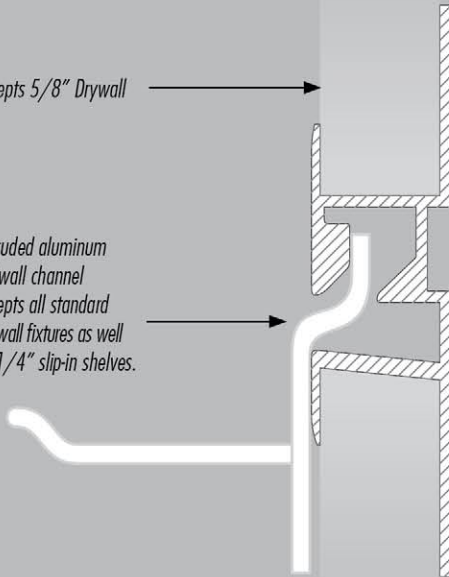

The V-Wall display system accepts both standard slatwall brackets AND floating, slip-in acrylic or glass shelves. V-Wall is supplied as an aluminum extrusion, ready to be embedded in 5/8" drywall but can be combined with other wall materials. It works well with laminate or veneer facings, keeping slot exposure to a minimum. V-Wall is compatible with energy efficient LED strip lighting (customer supplied & installed). Standard 96" lengths, raw mill finish, \$39.50 ea.

# V-WALL SYSTEM

Patent Number 8,602,227

Accepts 5/8" Drywall

Extruded aluminum slatwall channel accepts all standard slatwall fixtures as well as 1/4" slip-in shelves.

With customer supplied LED lighting.
